

17. ura: Thursday, May 7th 2020

- Today you are going to do some exercises in your workbook.

Open your notebook on page **48 and 49** and do the **exercises 1-5**.

Exercise 5 is a listening exercise and if you don't have the CD or a CD player, here is the tapescript so you still do the exercise.

1.25 p49 Exercise 5a

- 1 I'm Jun. How do we help the environment? Well, we recycle lots of things. We recycle paper – newspapers, magazines, cardboard boxes and things like that. And we recycle cans, too. I think that's important, because a lot of energy is used to make aluminium. But a lot less is used to recycle it.
- 2 Hello. My name's Delia. In our house we try to save electricity. I always turn lights off when I leave a room. Sometimes I forget and then Mum or Dad will say: 'Lights!' And I don't leave things on standby. That wastes a lot of electricity. So I always turn the TV or the computer off at night.
- 3 Henry here. How do we help the environment? I suppose transport is the most important thing, because we haven't got a car. We don't really need one. We live in the centre of town, so I can walk to the shops and to school. And another thing is that when we go on holiday we never go by plane. We always take the train. That's supposed to be better for the

environment, but I don't really like it, because it means that we can't go to places like Florida and Thailand.

- 4 Hello. I'm Olivia. Yes, we try to help the environment. A lot of the rubbish that is thrown away is packaging, so we try to cut down on that. We don't usually buy things like fruit, vegetables and meat at the supermarket, because everything there is in plastic boxes and bags. We buy those things at the market instead. There they put things in paper bags, which can be recycled. And when we go shopping, we always take our own bags, so we don't need to use plastic bags.

Push the button if it was easy!
